Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/28/2008 has been entered.

Claim Rejections - 35 USC § 112

The changes made to claims 1 and 12 have been reviewed and accepted; therefore, rejection under 112, second paragraph, has been withdrawn.

Drawings

The drawings filed 9/24/2004 are accepted.

Allowable Subject Matter

1. Claims 1-3 and 5-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of record teaches of a user interface for providing operational input to a portable telecommunication device without using keys, the user interface comprising: an electromechanical actuator including an electrical drive means provided with supply means for electrical power and a movable means arranged in relation to the electrical drive means in such a way that the movable means performs a mechanical movement when electrical power is supplied to the electrical

drive means, and wherein an electric signal is induced in the electrical drive means when the portable telecommunication device is moved in a way that causes the movable means to move, and a sensing unit for sensing the induced electrical signal, wherein the user interface further comprises.

The prior art of record fails to teach of control means for controlling a desired operation of portable telecommunication device by means of the signal induced in the electrical drive means, where **the control means include means for stopping the movable means in a position that makes it possible for it to move when the portable telecommunication device is moved. (See arguments dated 11/28/2008).**

Regarding claim 11, the prior art of record teaches of the use of an electromechanical actuator including an electrical drive means provided with supply means for electrical power and a movable means arranged in relation to the electrical drive means in such a way that the movable means performs a mechanical movement when electrical power is supplied to the electrical drive means, and where an electric signal is induced in the electrical drive means when the portable telecommunication device is moved in a way that causes the movable means to move, as a user interface for providing operational input to the portable telecommunication device without using keys for providing operational input in the portable telecommunication device.

The prior art of record fails to teach of control means including **means for stopping the movable means in such a position that makes it possible for the movable means to move when the portable telecommunication device is moved. (See arguments dated 11/28/2008).**

Regarding claim 12, the prior art of record teaches of a portable telecommunication device comprising: a user interface for providing operational input to a portable telecommunication device without using keys, the user interface comprising an electromechanical actuator including an electrical drive means provided with supply means for electrical power and a movable means arranged in relation to the electrical drive means in such a way that the movable means performs a mechanical movement when electrical power is supplied to the electrical drive means, and wherein an electric signal is induced in the electrical drive means when the portable telecommunication device is moved in a way that causes the movable means to move, a sensing unit for sensing the induced electrical signal.

The prior art of record fails to teach of a controller for controlling a desired operation of the portable telecommunication device by means of the signal induced in the electrical drive means, the controller including **means for stopping the movable means in such a position that makes it possible for it to move when the portable telecommunication device is moved.** (See arguments dated 11/28/2008).

Claims 2-3, 5-10; 13-17 depend on claims 1 and 12, respectively; therefore, they are allowed for the same reasons as set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
